> Ropella Industry Expertise

Elemental and compound gases have a wide array of utilizations in industrial processes, including metallurgy, aerosol propellants, and semiconductor production. They offer companies a huge opportunity to add value by helping the environment: they clean water and fuel, and can replace traditional, less eco-friendly chemicals. They also help to increase productivity, add flexibility, increase efficient operating time, and lower long-term costs.

Ropella 360's mission is to build lasting relationships between high-potential a-player talent, backable executives, board members, SMEs and transformational leaders. Our primary goal; providing ROI value towards growing the great companies we invest our time, talent and treasure into.

Building teams worldwide, in all functional areas and at all levels, with the best possible talent is one of the highest priorities for transformational leaders – because we all know – **the team with the best talent wins**. Especially so, in fast growing organizations.

> Our Solutions

With over 35 years as a global search leader, delivering the most advanced search execution capabilities, Ropella 360 has proven many times over, to be extremely well-versed at solving the most challenging “needle in a haystack” searches. While at the same time managing talent selection and development as a primary asset for ROI.

SMARTSM
Search System
