> Ropella Industry Expertise

There are few additives which can be connected to both construction materials and the foods we eat; minerals are one such group. Calcium carbonate, for example, is used in refining sugar, and also in cement and in oil drilling fluids. Kaolin is used in toothpaste and to accelerate blood clotting, as well as in paper and light bulbs. These mineral additives require relatively low energy in processing and they are bio-compatible, both big pluses in today's environmentally conscious markets. They outperform rivals and help turn materials into high performers, translating to lower costs and more opportunities for companies.

Ropella 360's mission is to build lasting relationships between high-potential a-player talent, backable executives, board members, SMEs and transformational leaders. Our primary goal; providing ROI value towards growing the great companies we invest our time, talent and treasure into.

Building teams worldwide, in all functional areas and at all levels, with the best possible talent is one of the highest priorities for transformational leaders – because we all know – **the team with the best talent wins**. Especially so, in fast growing organizations.

> Our Solutions

With over 35 years as a global search leader, delivering the most advanced search execution capabilities, Ropella 360 has proven many times over, to be extremely well-versed at solving the most challenging “needle in a haystack” searches. While at the same time managing talent selection and development as a primary asset for ROI.

SMARTSM
Search System
Recruit smarter. Not harder.

As a bestselling author of The Right Hire and a highly experienced practitioner, Patrick Ropella developed the SMART Search SystemSM, regarded as one of the most well respected, Talent Centric Executive Search Solutions available.
