Ropella Industry Expertise

Monomers are the literal building blocks of both the chemical industry and life itself. Monomers form supramolecular bonds with one another to build complex polymer chains (often with water as a by-product). These redundant bonds, often accomplished through double carbon-carbon bonds, result in end-products that are strong and durable. The utilization of membrane-based recovery processes is rising in this industry, recovering expensive feed stocks once lost to vent steaming

Ropella 360's mission is to build lasting relationships between high-potential a-player talent, backable executives, board members, SMEs and transformational leaders. Our primary goal; providing ROI value towards growing the great companies we invest our time, talent and treasure into.

Building teams worldwide, in all functional areas and at all levels, with the best possible talent is one of the highest priorities for transformational leaders – because we all know – **the team with the best talent wins**. Especially so, in fast growing organizations.

Our Solutions

With over 35 years as a global search leader, delivering the most advanced search execution capabilities, Ropella 360 has proven many times over, to be extremely well-versed at solving the most challenging "needle in a haystack" searches. While at the same time managing talent selection and development as a primary asset for ROI.

SM As a bestselling author of The Right Hire and a highly experienced practitioner, Patrick Ropella developed the SMART Search SystemSM, regarded as one of the most well respected, Talent Centric Executive Search Solutions available.
