## > Ropella Industry Expertise

From natural products like cotton to synthetic plastics, polymers are a major factor in adding strength, toughness, and flexibility to the products we use every day. New uses are always being developed, and so are more efficient methods for processing these materials. Plastics are at the core of much of this research, as we strive to develop ways to make them more eco-friendly, from increasing biodegradability to finding applications for recycled plastics to developing combustion processes that can capture the emitted heat energy.

Ropella 360's mission is to build lasting relationships between high-potential a-player talent, backable executives, board members, SMEs and transformational leaders. Our primary goal; providing ROI value towards growing the great companies we invest our time, talent and treasure into.

Building teams worldwide, in all functional areas and at all levels, with the best possible talent is one of the highest priorities for transformational leaders – because we all know – **the team with the best talent wins**. Especially so, in fast growing organizations.
