> Ropella Industry Expertise

Water treatment plays a key role in ensuring the viability and health of modern society, and also in helping us create more sustainable processes for the future. The chemicals used in water treatment include flocculants and coagulants, pH conditioners and alkalinity controllers, and biocides and algacides. Equally important are the chemicals which help to protect the equipment that treats water — antifoamers to reduce foam buildup, and scale inhibitors to prevent the formation of precipitates.

Ropella 360's mission is to build lasting relationships between high-potential a-player talent, backable executives, board members, SMEs and transformational leaders. Our primary goal; providing ROI value towards growing the great companies we invest our time, talent and treasure into.

Building teams worldwide, in all functional areas and at all levels, with the best possible talent is one of the highest priorities for transformational leaders – because we all know – **the team with the best talent wins**. Especially so, in fast growing organizations.

> Our Solutions

With over 35 years as a global search leader, delivering the most advanced search execution capabilities, Ropella 360 has proven many times over, to be extremely well-versed at solving the most challenging “needle in a haystack” searches. While at the same time managing talent selection and development as a primary asset for ROI.

SMARTSM
Search System
