## > Ropella Industry Expertise

From oscillating water columns to attenuators, and point absorbers to over-topping devices, wave energy converters aim to provide a low-cost, environmentally friendly alternative to fossil fuels and other non-renewable energy sources. This technology has the potential to harness vast amounts of otherwise wasted energy, generated as waves crash onto the shore. In addition to its obvious advantages, the collection of wave power also has the potential to protect our shorelines from coastal erosion.

Ropella 360's mission is to build lasting relationships between high-potential a-player talent, backable executives, board members, SMEs and transformational leaders. Our primary goal; providing ROI value towards growing the great companies we invest our time, talent and treasure into.

Building teams worldwide, in all functional areas and at all levels, with the best possible talent is one of the highest priorities for transformational leaders – because we all know – **the team with the best talent wins**. Especially so, in fast growing organizations.

## > Our Solutions

With over 35 years as a global search leader, delivering the most advanced search execution capabilities, Ropella 360 has proven many times over, to be extremely well-versed at solving the most challenging “needle in a haystack” searches. While at the same time managing talent selection and development as a primary asset for ROI.

**SMART**<sup>SM</sup>  
Search System  
Recruit smarter. Not harder.
